

FOR CARISSA

*Help make the first **10** gyms real.*

Magic City Athletics is live. Hit Zero is live. Carissa is already close to the first real user pain. The open question is whether she wants to help sell something Andrew has already built.

Carissa

FIRST USER VOICE

+9

THE FIRST MILESTONE

10

THEN WE REASSESS

The story that sells is not “Andrew built software.”

A real cheer gym had the problem. A real user started living in the product. Now the product needs someone credible enough to open doors.

THAT IS A STORY GYM OWNERS CAN FEEL.

- Gym owners trust people who understand the chaos: team seasons, practices, payment follow-up, parent questions, and staff handoffs.
- Carissa can sell from lived experience and user pain, not generic software jargon.
- Andrew stays where he is most valuable: product, demos, onboarding, support, assets, and fast execution.

Not a concept. Not a deck pretending to be a product.

 LIVE

The Hit Zero app

thehitzero.net is served on Vercel and wired to the live product stack.

 LIVE

The MCA website

mcaminot.com is the first public gym front door, powered by the same engine.

 READY

Production workflow

Owner dashboard, family links, public launch access, paid classes, rosters, and support paths are already in motion.

A CHEER GYM OPERATING SYSTEM

One app runs the whole gym.

Not just a website. Not another form. Not a payment link with a logo. Hit Zero connects the front door to the actual work of running a gym.

- Public class discovery, trials, and registration
- Square-connected paid-registration review
- Parent, athlete, staff, roster, schedule, packet, and owner workflows
- A platform Andrew keeps extending as gyms ask for more

Most gyms don't have a coaching problem. They have an operating one.

THE OLD WAY

Loose ends, every season

Forms, texts, spreadsheets, DMs, and separate payments: owners chasing the same gaps while parents stay confused.

WHAT OWNERS BUY

Fewer leaks, less drag

More paid registrations, fewer abandoned signups, a cleaner parent experience, and far less admin during peak season.

THE HIT ZERO WAY

One connected loop

Discovery, registration, payment, family setup, staff review, rosters, schedules, and owner visibility in one place.

WHY CARISSA MATTERS

She can make it plain

She does not have to prove why the problem matters. She can show an owner the exact pain and the exact better path.

The market already knows this category.

COMPETITOR SET	WHAT THEY SELL	WHAT IT PROVES FOR HIT ZERO
<i>iClassPro + Jackrabbit</i>	Established cheer/class suites: registration, billing, portals, schedules, reporting, skill tracking, branded app options.	Cheer gyms already buy software. Hit Zero does not need to create the category; it needs a sharper early wedge.
<i>Studio Pro + Studio Director</i>	Studio-style operations: lead management, class scheduling, tuition, payments, communication, attendance, and private lessons.	The pain is not niche. Every class-based youth business fights registration, billing, parent comms, and staff visibility.
<i>SportsEngine + TeamSnap + Amilia</i>	Broader sports/recreation platforms: registration, payments, schedules, rosters, messaging, websites, reporting, and mobile apps.	Big platforms validate the budget, but they are not built from one cheer gym's lived operating workflow.
<i>ClassJuggler + Gymdesk + Sawyer</i>	Lower-cost or adjacent tools for classes, memberships, payment processing, portals, websites, and customer records.	There will always be cheaper tools. Hit Zero wins when the buyer wants cheer-native setup, founder speed, and one accountable partner.

Market references checked June 13, 2026: iClassPro, Jackrabbit Class, SportsEngine Motion, Amilia, Studio Pro, The Studio Director, Cheer ClassJuggler, TeamSnap, Gymdesk, and Sawyer.

Do not beat everyone. Win the first 10.

1**Cheer-native**

Built around athletes, parents, teams, camps, classes, packets, skill work, and seasonal chaos.

2**One live loop**

Website interest can become registration, payment status, staff review, family setup, roster, and schedule context.

3**Founder-led**

Early gyms talk to the person building the thing. Feedback turns into product instead of a ticket queue.

4**OG status**

The first 10 gyms shape the product and become the proof network before paid scale is forced.

The wedge is not “we have every feature.” The wedge is: the first gyms get a live cheer-specific operating layer, built with them, by someone who can ship.

Get 9 more gyms. Reach 10. Then decide what this becomes.

1

MCA stays the proof gym and first case study.

2

Carissa opens warm, credible gym-owner conversations.

3

Andrew handles demo, setup, product, onboarding, fixes, and support.

4

The first 10 give proof, patterns, testimonials, and pricing evidence.

The goal is not to build a huge company tomorrow. It is to prove 10 gyms want this enough that the next chapter becomes obvious.

What 10, 25, and 50 gyms can look like.

SCENARIO	PRICE / GYM / MO	10 GYMS • MRR / ARR	25 GYMS • MRR / ARR	50 GYMS • MRR / ARR
Conservative	\$299	\$2,990 / \$35,880	\$7,475 / \$89,700	\$14,950 / \$179,400
Base	\$499	\$4,990 / \$59,880	\$12,475 / \$149,700	\$24,950 / \$299,400
Upside	\$799	\$7,990 / \$95,880	\$19,975 / \$239,700	\$39,950 / \$479,400

Scenarios, not promises. Optional setup / onboarding revenue sits on top. The first 10 can start as OG reference partners, then convert the model once the proof is real.

Sell something that already exists.

1

Open doors

Identify gym owners who would actually feel this problem and take a founder call.

2

Tell the truth

Explain the admin pain in plain cheer-gym language, not SaaS language.

3

Qualify fit

Listen for owners who want cleaner registration, paid flow, parent clarity, and staff visibility.

4

Help land 9

Bring the right gyms into the OG network so the business becomes undeniable.

Not asked of Carissa: build product, write code, manage technical support, own implementation, or carry the whole company. Andrew handles the system.

No one carries the whole thing.

CARISSA

Founding Growth Partner

Opens conversations, tells the first-user story, listens for owner pain, shapes the first 10-gym network, and becomes a trusted customer-facing voice.

ANDREW

Founder — Product & Platform

Maintains the app, builds what gyms need, prepares demos and sales assets, handles technical onboarding, and keeps support moving behind the scenes.

THE FIRST 10 GYMS

Proof Network

Use the platform for real work, give feedback, supply testimonials or case-study rights where appropriate, and make the category credible.

THE HARD PART IS DONE

The foundation is already built.

- Live PWA app and live MCA public website
- Supabase database, auth, security, storage, edge functions, and production deploys
- Registration, family packet, staff review, roster, schedule, billing, and Square paths
- Existing gym packet, sales playbook, investor brief, and handoff docs

The expensive part is already absorbed.

SOFTWARE-FIRST

Low overhead

No storefront, no inventory, no travel-heavy rollout for the first phase.

ANDREW-BUILT

Fast iteration

Customer feedback becomes product quickly, without waiting on a vendor roadmap.

REPEATABLE

High leverage

Every setup, asset, demo, objection, and fix makes the next gym easier to land.

It can stay intentionally small and still matter. At 25 or 50 gyms, it starts becoming a real platform company.

*Then it's a brand,
not just a tool.*

10

Ten gyms gives the team proof, patterns, testimonials, pricing evidence, and a real reason to talk about bigger paths.

- Sharper sales assets and case studies
- Premium modules: AI judging, video, clinics, billing, parent comms
- A national founder-gym story bigger than any one gym
- Optional investor, strategic partner, or acquisition conversation after proof

*Look at what's already here,
then decide if it's silly
not to try.*

The software exists. The first gym exists. The first user pain exists. The ask is focused: help land 9 more gyms and see what the first 10 prove.
