

A PROPOSED IN-KIND MAINTENANCE PARTNERSHIP

Keeping MCA's digital operation moving, without adding another vendor.

Hit Zero and the MCA website now form a working operating layer for the gym: registration, payments, family setup, staff review, schedules, rosters, and a live public front door.

CONTINUED SUPPORT FROM ANDREW

Maintain, improve, and tailor Hit Zero and mcaminot.com as MCA needs change.

REQUESTED EXCHANGE

Standard gym fees for Arlowe Emmel and Alivia Emmel are covered as the ongoing retainer.

THE POINT OF THE PROPOSAL

This keeps the relationship simple: MCA gets ongoing technology support; my family receives a tuition credit.

I volunteered to help because I care about MCA and because my girls are part of the gym. The work has now become a real business asset: a custom operating system, a custom public website, and a support path MCA can keep using instead of piecing together software, text threads, spreadsheets, and vendor tickets.

WHAT I AM OFFERING

Continued ownership of the technical side: website maintenance, Hit Zero updates, issue intake, workflow improvements, hosting/deployment support, class/registration changes, and practical help when staff or families run into problems.

WHAT I AM ASKING

Cover the standard gym fees for Arlowe, age 8, and Alivia, age 5, while they participate at MCA. This is not a request for a cash retainer. It is an in-kind exchange that keeps costs predictable for the gym and lets me keep supporting the system without treating every request like a billable interruption.

THE BUSINESS REASON THIS IS FAIR

MCA receives the practical value of a custom software partner and website maintainer at a rate far below what a separate software stack, developer, designer, and support vendor would normally cost.

ONE SOURCE OF TRUTH

Classes, signups, payment status, family setup, and staff review live in one workflow instead of scattered messages.

BUILT FOR MCA

The system reflects MCA's actual programs, pricing, staff needs, and parent experience, not a generic template.

ONGOING CARE

Changes can keep coming through a cleaner process, without owners feeling like every request is a burden.

WHAT MCA ALREADY HAS IN HAND

A public website and an operating app that work together.

The value is not just the code. It is the connection between the website, the family experience, staff operations, payment flow, and future changes. That connection is where MCA saves time.

AREA	VALUE TO MCA	ONGOING SUPPORT INCLUDED
Custom MCA website	Professional front door for programs, coaches, pricing, trials, account creation, and tuition links.	Content changes, page updates, CTA changes, visual polish, deployment, and upkeep.
Hit Zero operating app	Family signup, gym access requests, registration, staff review, roster/schedule workflows, and parent/staff views.	Bug fixes, workflow tweaks, staff feedback, new fields, route fixes, and practical iteration.
Registration and payment flow	Paid classes can route into Hit Zero and Square instead of creating unpaid signups that staff has to chase.	Class updates, payment link checks, wording improvements, and handoff support.
Support process	Requests can move out of scattered texts/Facebook/calls and into a cleaner, trackable support rhythm.	Issue triage, prioritization, follow-up, and small fixes without turning every message into a separate invoice.
Future tailoring	MCA keeps getting software shaped around how the gym actually runs.	Reasonable ongoing improvements as MCA learns what it wants from the system.

WHY THIS MATTERS OPERATIONALLY

A gym does not just need a website. It needs parents to know what to do next, staff to know who is paid or pending, and owners to stop being the only operating system. That is what this work is designed to solve.

REPLACEMENT VALUE, STATED CONSERVATIVELY

The alternative is not free. It is usually several tools plus ongoing human support.

Public pricing from comparable platforms shows that gym software, websites, payments, branded apps, and support all carry real costs. Hit Zero gives MCA a tailored version of that operating layer without adding another monthly software vendor.

Class/gym management software	Jackrabbit Class publishes pricing that starts at \$49/month, with Jackrabbit Plus branded-app pricing starting at \$93/month and enterprise options listed higher.	\$49-\$245+/mo
Sports business operating platform	SportsEngine Motion lists a \$295 start cost, plus a 1% technology fee and payment processing fees, for class management, online registration, member management, mobile app, financials, and website tools.	\$295 + fees
Website platform and hosting	Squarespace business/commerce plans publicly list monthly platform costs before custom design, edits, business-specific workflows, or developer support.	\$18-\$36+/mo
Custom build and maintenance	A tailored app plus website normally requires someone to design, build, deploy, maintain, troubleshoot, and keep improving it as the business changes.	Not included in SaaS

THE TRADE IS DELIBERATELY BELOW MARKET

Covering two standard athlete fee accounts is a straightforward, local, relationship-based exchange for a software and website package that would otherwise be purchased, configured, and maintained through multiple vendors.

Source context: Jackrabbit Class pricing, <https://www.jackrabbitclass.com/pricing/>; SportsEngine Motion pricing, <https://www.sportsengine.com/motion/pricing/>; TeamSnap pricing overview, <https://www.teamsnap.com/pricing/>; Squarespace pricing, <https://template-selector.squarespace.com/pricing>. Prices and terms can change; figures are included as market context, not as a direct quote for MCA's exact needs.

SIMPLE, RESPECTFUL, EASY TO REVISIT

Proposed trade: continued MCA technology support in exchange for covering Arlowe and Alivia's standard gym fees.

My goal is to make this easy on everyone: the owners have a reliable person continuing to care for the digital side, staff can ask for changes without feeling like they are bothering me, and I can keep doing the work while also protecting the business I am building.

INCLUDED IN THE EXCHANGE

- Maintenance and reasonable ongoing changes for mcaminot.com.
- Maintenance and reasonable ongoing changes for Hit Zero as used by MCA.
- Registration, trial, account, class, payment-link, and staff workflow updates.
- Issue intake and troubleshooting through a cleaner support process.
- Deployment, source checks, and practical monitoring of live public flows.

KEPT SEPARATE IF NEEDED

- Third-party fees: Square, domain names, email/SMS providers, app stores, or paid AI/API usage.
- Large new product modules that are outside normal maintenance.
- Emergency, same-day work caused by third-party outages outside our control.
- Legal, accounting, payroll, tax, or compliance advice.

OPTIONAL GROWTH CONVERSATION

I am open to every road for pushing this forward. The first plan is simple: add one more OG gym, bring in the next eight as discounted founding gyms, then find the right cheer-world operator to lead sales and help with funding if needed.

10

GYMS

\$5,990 MRR
\$71,880 ARR

25

GYMS

\$14,975 MRR
\$179,700 ARR

100

GYMS

\$59,900 MRR
\$718,800 ARR

At even a low-end \$599/month, 10 gyms is where the investor conversation starts to become real: 10 gyms means many more coaches, parents, and athletes using the system. If any owner, coach, or cheer parent wants to partner on selling this, I would love to open that conversation.
